

# Military Operations Research Society

Leading the National Analytical Community

## Cyber Analysis Workshop

28-30 October 2008

WBB Consulting, Reston, VA

Participants will:

- Understand the nature of the 2008-2010 cyber threat
- Improve analytical approaches and techniques that support cyberspace operations.
- Conduct discussions between workshop participants and senior government leaders on recommendations for improving the analytical capability of cyber operations.

Participant tracks include:

- Discipline Leads Cyber Environment – Fourth Generation Warfare
- Cyber Situational Awareness and Command and Control
- Cyber Vulnerabilities, Protection, and Defense
- Cyber Deterrence
- Cyber Exploitation and Offensive Operations
- Humans in Cyber Networks

Register to attend this event at [www.mors.org](http://www.mors.org).

Be a part of the  
analytical solution!!
